VNR Vignana Jyothi Institute of Engineering

Electronics and Communication Engineering | Course Code: EC201

Electronic Devices & Analog Circuits - Comprehensive Syllabus Lecture No

Syllabus Focus: EC201 Full Syllabus Comprehensive Lecture Notes Units 1-5

Summary: Complete syllabus lecture notes covering Electronic Devices & Analog Circuits. Include

I. UNIT-BY-UNIT COMPREHENSIVE SYLLABUS CONTENT

Unit 1: Semiconductor Diodes & Applications

" Syllabus Scope: Energy band theory, PN junction barrier potential, forward/reverse bias, Zener breakdow

Unit 2: Bipolar Junction Transistors BJT

" Syllabus Scope: CB, CE, CC configurations, input/output characteristics, DC load line, Q-point stabilit

EC201: Electronic Devices & Analog Circuits - Advanced Topics & Assessment

Academic Track: Electronics and Communication Engineering - Units 3, 4, 5 & Examination Matrix

---

II. ADVANCED SYLLABUS UNITS (UNITS 3 TO 5)

Unit 3: Field Effect Transistors FET & MOSFET

" JFET pinch-off voltage, Enhancement and Depletion MOSFETs, drain and transfer characteristics, CMOS logic in

Unit 4: Small Signal Low Frequency Amplifiers

" h-parameter model of CE amplifier, voltage gain, current gain, input/output impedance, frequency response Bo

Unit 5: Operational Amplifiers & Feedback Circuits

" Ideal op-amp characteristics, inverting/non-inverting amplifiers, integrator, differentiator, instrumentatio

III. HIGH-YIELD SEMESTER EXAM QUESTION BANK & SOLUTIONS

1. Derive the stability factor S for a self-bias voltage divider BJT circuit and explain how it prevents
2. Draw the small-signal h-parameter equivalent circuit of a CE amplifier and derive equations for voltag
3. Explain the operation of an inverting Operational Amplifier integrator and derive its output voltage t

IV. PRESCRIBED TEXTBOOKS & REPOSITORY CITATIONS

* Jacob Millman, Christos C. Halkias - Integrated Electronics McGraw-Hill
* Adel S. Sedra, Kenneth C. Smith - Microelectronic Circuits Oxford University Press 7th Ed
