Andhra University College of Engineering

Electrical and Electronics Engineering | Course Code: EE301

Power Systems Engineering - Semester Exam Question Bank & Worked Solutio

---

Syllabus Focus: EE301 High-Yield Semester Exam Question Bank & Model Solutions

Summary: Comprehensive question bank with previous semester university examination questions, m

I. UNIT-BY-UNIT COMPREHENSIVE SYLLABUS CONTENT

Unit 1: Transmission Line Parameters

" Syllabus Scope: Inductance and capacitance calculation for 1-phase and 3-phase lines, GMD and GMR formu

Unit 2: Performance of Transmission Lines

" Syllabus Scope: Short, Medium Nominal T and Pi, and Long lines, ABCD parameter derivation, Surge impeda

EE301: Power Systems Engineering - Advanced Topics & Assessment

Academic Track: Electrical and Electronics Engineering - Units 3, 4, 5 & Examination Matrix

---

II. ADVANCED SYLLABUS UNITS (UNITS 3 TO 5)

Unit 3: Symmetrical Fault Analysis

" Transients on transmission lines, Short circuit of synchronous machine, Selection of circuit breakers, Curre

Unit 4: Symmetrical Components & Unsymmetrical Faults

" Fortescue theorem, Sequence networks Positive, Negative, Zero, Single Line-to-Ground LG, Line-to-Line LL, an

Unit 5: Power Flow Analysis

" Bus classification Slack, PQ, PV, Formation of Y-bus matrix, Gauss-Seidel and Newton-Raphson power flow algo

III. HIGH-YIELD SEMESTER EXAM QUESTION BANK & SOLUTIONS

1. Derive ABCD parameters for a Nominal-Pi transmission line network and draw receiving end phasor diagra
2. Formulate sequence impedance networks for a single line-to-ground LG fault and determine fault subtran
3. Formulate the Newton-Raphson power flow algorithm and derive elements of the Jacobian matrix in polar

IV. PRESCRIBED TEXTBOOKS & REPOSITORY CITATIONS

* I.J. Nagrath, D.P. Kothari - Modern Power System Analysis McGraw-Hill 4th Ed
* Hadi Saadat - Power System Analysis PSA Publishing
